 Tribometry (Slip resistance testing)
 Program evaluations

 PrepWise Pulse Survey

FP

## Real-World Scenarios: How Risk Services Can Benefit Your Company

## Situation

You just expanded your call center operations and need individual office ergonomic evaluations at 75 workstations. However, you lack the internal expertise to perform them.

You receive a citation from OSHA for silica exposure and need to respond.

Risk Services can help complete the evaluations, identify individual workstation setup solutions and deliver "train-the-trainer" customized sessions for your staff ergonomic champions.

Risk Services can conduct industrial hygiene exposure monitoring and deliver a report with certified lab analysis and actionable recommendations to help you meet OSHA standards.

Situation		Solution
You have <b>CNA's Primary Casualty</b> <b>coverage</b> but your business is growing and you're opening a new facility this year.		Call on Risk Services for an in-depth property pre-occupancy survey before you open.
CNA's Risk Control team completed an Industrial Hygiene evaluation at one of your locations and discovered an occupational noise issue. Due to the findings, you'd like to evaluate nine more locations across the country.		Risk Services' flexible payment options are invoiced outside of premium, so you can purchase and pay for all nine upfront or pay for each of them as the service is completed.
You're considering CNA's package policy for your business needs. However, you need to have your fire sprinklers evaluated before expanding your manufacturing line and don't have time to wait for your policy to kick in.	•	Use Risk Services to purchase a fire sprinkler evaluation.
